EDUCATION

BMS Institute of Technology and Management

Bachelor of Engineering – Computer Science Engineering | CGPA: 8.85+
2025 – 2028

PROJECTS

Context-Aware Hypoglycaemia Risk Intelligence System

Frontend Developer

- Developed the frontend interface for a healthcare-focused application supporting hypoglycaemia risk assessment.
- Designed intuitive user interfaces and collaborated on system integration.
- Focused on improving usability and accessibility.

Krishi Sakhi – Smart India Hackathon

Research & Backend Team Member

- Contributed to research, backend planning, and project presentation.
- Participated in solution design, documentation, and technical discussions.
- Collaborated with team members to address real-world agricultural challenges.

Library Database Management System

- Developed a C++ and SQL-based library management platform.
- Implemented book inventory management, issue-return tracking, and user record maintenance.
- Applied DBMS concepts for efficient data organization and retrieval.

SKILLS

Programming Languages: C, C++, SQL

Core Computer Science: DSA, OOP, DBMS

Tools & Platforms: Git, GitHub, VS Code

Areas of Interest: Software Engineering, AI, Healthcare Technology

ACHIEVEMENTS

- Solved 95+ LeetCode problems in C++.
- Participant – Smart India Hackathon (SIH).
- Participant – Inception Hackathon.
- Maintained a CGPA of 8.85+ with consistent academic improvement.
